

# Science Quiz Study Guide for Quiz on Wednesday

All work you need Mrs. Huddleston to see needs to be put in the basket, not the black hole.

All work including tests can be redone or made up and will not be docked for being late.

A check plus means you did great. A check means you need to fix or finish and turn in again. A check will show as an incomplete on the portal. If an assignment says missing, it means Mrs. Huddleston never got it.

When Mrs. Huddleston says, "Class", you say "yes" and be quiet.

When Mrs. Huddleston says "Folders, one two three," you hand your folder to your captain to put in the cabinet.

If you need more time when Mrs. Huddleston says, "Do you need more time?", you make a cricket noise. If you don't need more time, you stay silent.

Hands and Eyes mean clasp hand together and look at the teacher. Keep hands together until you hear, "Thank You"

If you get a smiley point, you are supposed to have a one second party with a short "Whoo Hoo."

On Mondays, you get a grade print out. Take it home and get it signed and brought back for extra credit by Friday.

An independent variable is the thing the scientist purposely test or change to see what happens. Independent variables are placed on the bottom of a graph.

A dependent variable is the results or what you measure from your experiment. Dependent variables are place on the side of the graph. (Clue: I DID IT)

Graphs need to have a title, and the x and y axis labeled.

Constants are the things you have to keep the same in order to have a fair test (valid data).

Some experiments use a control which is the thing scientists DON'T change or test to have something to compare results too.
